--ABSTRACT--

In the English translation document, please add the paragraph at page 24 line 1, after the newly added ABSTRACT section heading, as follows:

The invention relates to a device and a method to represent and/or display a data index structure in an XML file in a very easy manner with the aid of an internet-capable language, especially XML, in automation apparatus, so-called embedded devices, that as a rule do not have their own file index structure and to bringing said data index structure to the embedded device by sending the file so that the target machine can work as a web server thereby enabling remote access.
